QUESTION

A patient has been prescribed a medication that is known to cause drowsiness. The nurse should instruct the patient to:

ANSWER

avoid driving or operating machinery until they know how the medication affects them.

RATIONALE

The medication may cause drowsiness, which could impair the patient's ability to drive or operate machinery safely. It is important for the patient to be aware of this potential side effect and take precautions to avoid accidents.

TEST TAKING TIP

When asked about instructions for a medication, consider the most common and safest advice, especially regarding activities like driving or operating machinery.
