## A vertical rectangular template for a map figure. It features a light gray and white checkered pattern. At the top, there is a small square icon of a pencil. The template has dashed lines indicating where to fold and a solid line indicating where to cut. The text "MAP FIGURE" is written vertically on the left side.

A diagram of a hexagonal lattice. It features a central hexagon formed by dashed lines. This central hexagon is surrounded by a larger hexagon formed by solid lines. The space between the two hexagons is divided into six trapezoidal regions. Each of these regions contains a solid line segment that is parallel to one of the sides of the central hexagon. The entire structure is set against a background of a regular grid of solid lines.

1.  Cut out carefully with a sharp knife or scissors, using the | marks as guides
2.  Fold along the dotted lines, making sure the  hatched areas are hidden or face down
3.  Optionally, fix it with glue
